OSE and International Colleagues Celebrate Christmas: Building a Workplace of Warmth and Happiness

Celebrating the holiday season, OSE hosted a Christmas event to honor its diverse workforce. Embracing a "people-first" culture, the celebration aimed to build emotional connections, ensuring international colleagues feel valued and at home even while working abroad.

Supported by the Bureau of Industrial Parks, OSE organized a creative gala featuring festive decor and live music. The lively event provided employees a well-deserved break from their busy schedules to relax and enjoy the spirit of the season.

Nearly 600 employees, including colleagues from Vietnam and the Philippines, gathered for the festivities. Highlights included a Creative Costume Contest and talent performances. These activities fostered cross-cultural interaction and strengthened team cohesion amidst music and laughter.

Through such events, OSE expresses deep appreciation for its staff, transforming the workplace into a community of warmth and belonging. OSE remains committed to accompanying employees through every milestone and building a happier, friendlier environment.

ESG Info-SASB

(Sustainability Accounting Standards Board)

- Founded in San Francisco in 2011, the Sustainability Accounting Standards Board (SASB) is a non-profit organization dedicated to developing sustainability accounting standards. In 2018, SASB introduced the Materiality Map, covering five dimensions, 11 sectors, 77 industries, and 26 universal ESG issues. This map identifies ESG topics that significantly impact financial performance and operations, providing a voluntary framework increasingly adopted by companies worldwide.
- Alongside GRI Standards, SASB plays a critical role in sustainability reporting by offering investors industry-specific ESG metrics with material financial implications. As sustainable finance products become a key focus for investors, investees, and global sustainability efforts, demand for transparent sustainability information has grown. Through disclosures aligned with SASB Standards, companies and investors can effectively communicate financially material ESG information.
- SASB indicators highlight industry-specific risks and opportunities, helping companies strengthen sustainability management and enabling investors to implement sustainable investment strategies—advancing global sustainability development.
